

Ariana Flores — Layout Approval Document

Ariana Flores — Layout Approval Document

Project: Ariana Flores Sports Photography Website

Designer: DJ Moody

Date: June 15th, 2026

Purpose:

This document confirms that the client, Ariana Flores, has reviewed the website layout and the previously approved wireframes. The layout represents the visual structure, spacing, hierarchy, and arrangement of elements on each page. This review ensures that the layout accurately reflects the approved wireframes before moving forward to the mockup phase.

Client Feedback:

"The layout matches the wireframes well and everything feels clean and organized. Please make the call-to-action button a little larger on the Home page, and reduce the shadow under the gallery images. Everything else looks good and consistent with the wireframe structure."

Adjustments Made:

Based on the client's feedback, the following adjustments were made:

- Increased the size of the Home page call-to-action button to improve visibility and emphasis.
- Reduced the shadow intensity under gallery images to create a cleaner, more modern look.
- Double-checked spacing and alignment across all pages to ensure consistency with the approved wireframes.

Client Approval:

The client has reviewed the updated layout and approves moving forward to the mockup phase.
