

Usability Study Report

Introduction

This usability study was conducted to evaluate the design, navigation, clarity, and overall user experience of the website. Five participants were included, representing a mix of everyday users, semi-technical users, and the developer. The goal was to identify strengths, usability issues, and opportunities for improvement.

Participant Profiles

Participant 1: Everyday user (Parent)

Participant 2: Semi-technical user (HTML/CSS experience)

Participant 3: Everyday user (Sister)

Participant 4: Emotional/reactive user (General user)

Participant 5: Developer self-evaluation (Expert review)

Positive Findings

Homepage Clarity

All participants agreed the homepage clearly communicated the purpose of the website. First impressions were consistently positive, with several users noting strong coloring, layout, and an appealing hero image.

Navigation Clarity

Participants described the navigation menu as clear, precise, and easy to use. One user called it “crystal clear,” and another found the navigation buttons to be the easiest part of the site.

Information Findability

All reviewers reported that information was easy to locate, indicating strong content organization.

Page Navigation Flow

No participant experienced confusion while navigating between pages, showing consistent structure and predictable user flow.

Text Readability

All reviewers confirmed the text was easy to read throughout the site.

Image Clarity

Images were consistently described as clear and appropriately sized.

Visual Appeal

Multiple reviewers described the site as visually appealing, attractive, and enticing.

Loading Speed

All reviewers reported good or very good loading speed.

Contact Form Usability

The contact form worked smoothly with no confusion or delays.

Button and Link Functionality

All buttons and links worked as expected.

Mobile Experience

Reviewers who tested mobile described the experience as great.

Areas for Improvement**Gallery Layout**

Multiple reviewers noted that the gallery needs improvement. Users want to scroll through the entire gallery instead of being limited to three images at a time. One reviewer also suggested adding more pictures to showcase more examples of work.

Header Spacing and Visibility

Reviewers suggested reducing header height so more gallery images are visible without scrolling.

Header Color

Several reviewers recommended changing the header color to improve visual harmony and reduce contrast.

Logo Adjustments

One reviewer suggested updating or changing the logo to better match the site's aesthetic.

Login vs Register Clarity

One reviewer had questions about the difference between "Login" and "Register," suggesting these labels may need clearer explanation.

Contact Page Completion

Reviewers noted that the contact page needs to be fully added and should contain the contact form inside the page rather than separately.

Map Necessity

One reviewer stated that a map is not needed, suggesting removal if it does not serve a clear purpose.

Services Page Enhancements

Reviewers suggested adding pricing or images to the services page to improve clarity and customer understanding.

User Suggestions

Add more gallery images to show more examples of work.

Make navigation even more user-friendly.

Adjust the homepage background color.

Remove the map if it does not serve a functional purpose.

Add pricing or images to the services page.

Developer Self-Assessment

The developer identified areas for improvement including gallery scrolling, header color, logo refinement, and enhancing the services page with pricing or images. This self-assessment aligns with user feedback and demonstrates ongoing commitment to quality and usability.

Conclusion

Across all five reviewers, the website shows strong usability, clear navigation, appealing visuals, and smooth performance. The most consistent improvement areas involve expanding the gallery, adjusting header color and spacing, refining the services page, completing the contact page, and clarifying login vs register. This feedback provides a clear roadmap for final refinements and continued improvement of the website.
